

Step, stroll or stride toward lower health care costs.

Walking every day may help you earn Health Savings Account (HSA) credits.

Walking may be one of the easiest ways to maintain an active and healthy lifestyle. With the UnitedHealthcare Motion incentive program, walking may even help you to save on health care costs. So if you're looking to help boost your well-being and lower your health care costs, just lace up your sneakers and go.

Increased physical activity and rewards go hand in hand.

As UnitedHealthcare plan members, you and your enrolled spouse can use UnitedHealthcare Motion to help take greater control of your health while, at the same time, **earning up to \$3 per day in Health Savings Account (HSA) credits** for meeting specific FIT goals. These credits are deposited quarterly into your HSA.

Try to hit your FIT goals every day.

- F** **Frequency**, or the number of times you are physically active.
- I** **Intensity**, or periods of time of high physical activity.
- T** **Tenacity**, or achieving total daily activity goals.

All you have to do is meet the walking goals and review your progress to help yourself earn credits.

UnitedHealthcare Motion promotes physical activity through the use of a compatible activity/fitness tracker.

Intensity	3,000 steps in 30 minutes	\$1.00
Tenacity	10,000+ total daily steps	\$1.00
Total daily rewards available		\$3.00

Hit all of the daily goals and you can earn up to \$1,095* per year.

Incentives are processed quarterly and will be available in your HSA. Since the money in your HSA is yours, you can carry over all the money from year to year.
