What are Medicare Advantage HMO retiree plans?

Medicare Advantage (or Medicare Part C) health plans are administered through private insurance companies. They combine Medicare Part A (hospital stays), Part B (doctor visits) and optional Part D (prescription drug) coverage into a single plan.

Health Maintenance Organization (HMO) plans provide care through a network of local doctors and hospitals. HMOs generally do not provide out-of-network coverage except in emergencies.

Clinical programs that offer a continuum of care.

We’ve built programs into our plans that can make a positive difference in the lives of your retirees and in the overall cost of care.

- Prevention and wellness programs educate retirees on how to maintain health and wellness.
- Disease- and condition-specific management programs can help retirees manage acute and chronic conditions.
- High-risk case management programs can help support and coordinate care for retirees with multiple complex conditions.
- Advanced illness programs can help retirees and families dealing with catastrophic health concerns by offering comprehensive health management, palliative care and end-of-life support.
